DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a. "said target object" (line 3) lacks proper antecedent basis since it was not properly earlier referred to.

Claim Rejections - 35 USC § 103

- 3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Holmstrand(4,821,461), or Minami(5,975,997), each considered in view of the Japanese(411114808) reference.
 - a. Both Holmstrand and Minami, disclose a method of supplying a specified amount of a polishing agent comprising abrading particles between a lapping plate and a target object to be polished, and causing the lapping plate to rotate at a specified rotational speed so as to move relative to the target object while keeping the lapping plate practically in contact with the

Application/Control Number: 10/006,977

Art Unit: 3724

target object while a lapping process is carried out on the target object. In Holmstrand, see column 1, lines 22-36. In Minami, see the abstract.

Page 3

- b. Neither Holmstrand nor Minami discloses using a polishing agent comprising mother particles and abrading particles on surfaces of the mother particles.
- c. The Japanese reference discloses using a polishing agent comprising mother particles and abrading particles on surfaces of the mother particles in a slurry for polishing a target object.
- d. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the methods of both Holmstrand and Minami by replacing the polishing agent therein with a polishing agent which comprises mother particles and abrading particles on surfaces of the mother particles as taught by the Japanese reference in order to provide for better lapping of the target object.

Response to Arguments

5. Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE

Art Unit: 3724

FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy V Eley whose telephone number is 571-272-4506. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
